

UniCoat 3150 CCS

The UniCoat 3150 CCS is our midsize treating and coating solution. With its small footprint and easy access for cleaning, the UniCoat 3150 CCS is a very versatile seed treating and coating solution for midsize to larger production-based vegetable and agronomic seed crop applications.

- Treating rate of 80-125 lbs of seed per minute
- 1:1 coating batches of 50-80 lbs of seed per minute
- 31.5" treating and coating chamber with spun steel machined rotor
- Rotor driven by 10 HP belt drive platform, soft- start module
- Atomizer driven by 1/8 HP motor
- Top cover contains two large access doors for ease of cleaning
- Units are configured with two Masterflex L/S and I/P peristaltic pumps
- Control System:
 - PLC logic control
 - Human Machine Interface (HMI)
- Optional add-ins:
 - Variable speed drive
 - Up to four powder feeders
 - WIPS "Weigh in place" loss in weight system for both liquid and powder applications
